Respiratory System - Multiple Choice Test ©Sheri Amsel • www.exploringnature.org

Na	Name		Date	
1	Of the four parts of respiration, the part when oxygen and carbon dioxide are exchanged in the capillaries lining the alveoli in the lungs, is: A pulmonary ventilation B external respiration C transport of respiratory gases D internal respiration	6	The organ of the respiratory system where air is warmed, moistened and cleaned is the: A nose B pharynx C larynx D trachea E All of the above.	
2	Of the four parts of respiration, the part when oxygen and carbon dioxide are exchanged in the body's tissue cells, is: A pulmonary ventilation B external respiration C transport of respiratory gases D internal respiration The organs of the respiratory system include all the following <u>EXCEPT</u> :	8	The organ of the respiratory system that closes when food is being swallowed is the: A nose B pharynx C larynx D trachea E All of the above. The organ of the respiratory system that is kept open by rings of cartilage is the:	
	A nose B trachea C lungs D body tissues		A nose B pharynx C larynx D trachea E All of the above.	
4	The organs of the conducting zone of the respiratory system include all the following <u>EXCEPT</u> : A nose B trachea C bronchi D alveoli	9	The organ of the respiratory system that traps bacteria with a ring of tonsils is the: A nose B pharynx C larynx D trachea E All of the above.	
5	The organs of the respiratory zone of the respiratory system include all the following <u>EXCEPT</u> : A trachea B small bronchioles C alveoli ducts D alveoli	10	The lungs are covered by a two-layer membrane called the: A pleura. B diaphragm. C respiratory membrane. D intercostal muscles.
